

## BeGreen MAX

Our **BeGreen MAX** tiles bring together a superb combination: the aesthetic result provided by artificial turf with the soft feeling of a rubber tile.

These special tiles have been designed and manufactured for outdoor and indoor use. Most people use these for multi-functional areas in sports fields and gyms. Just imagine a maintenance-free zone that you will be able to set very quickly, without installation costs.

Take your Gym to another level by adding a high performance track where you can use sleds with up to 280kg. A long term solution suitable also for outdoor use.

### COMPOSITION

Recycled SBR Rubber, MDI polyurethane bonding agent, Multipower artificial turf.
